DETAILED ACTION

1. This action is responsive to communications: Application filed 5/30/01.
2. Claims 1-119 are pending in the case. Claims 1, 31, 61, 62, 63, 87, 111, 112, 113, 114, 115, 116, 117, 118, and 119 are independent claims.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-62, 111, and 113-119, drawn to altering a hyperlinked document or web page, classified in class 715, subclass 530 and class 715, subclass 501.1.
 - II. Claims 63-110 and 112, drawn to activating an agent module for the retrieved document, classified in class 709, subclass 202.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because altering of a retrieved hyperlinked document or web page does not require an agent module. The subcombination has separate utility such as activating an agent module when retrieving the document.

Art Unit: 2176

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
7. If Group I is elected, then the Applicant must elect one of the following species:

Election of Species

8. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Claims 2, 4-5, 8-10, 13-30, 32, 35, and 38-60 directed to altering of a document in class 715, subclass 530.

Species II: Claims 3 and 33-34 directed to activation of an event generated by a sight agent in class 709, subclass 202.

Species III: Claims 6-7, 11-12, and 36-37 directed to sending and receiving information to and from a server across a network in class 709, subclass 203.

9. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1 and 31 are generic.
10. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 2176

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

11. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

12. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

13. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

14. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
